Vendor payment investigation

Case VBDEMO001042 | 2026-11-09T17:00:13.197608+00:00

Investigation summary

4 documents processed. 4 findings require review. The system records observations and discrepancies. It does not establish fraud or approve payments.

Document overview and extracted information

01-purchase-order.pdf (purchase order)

SHA-256: e3c3413d1c7bd87d455fb992697d09d9f96b2dcbbb87aebb3bf62a134407851c

ADP-02 / Power adapter	10	200.00	2,000.00 / p1

Contextual analysis and visual forensic findings

F001 / Unusual numeric typography

MEDIUM / Visual observation

Numeric span uses Courier-Bold at 16.0 pt; median monetary span is 11.0 pt. Legitimate emphasis is an alternative explanation.

Detection confidence: uncalibrated. Priority is a review category, not a fraud probability. Consult the source extraction confidence and original evidence.

Related findings sharing source regions: F002, F003

Next verification: Inspect the original and request the vendor-issued version. Typography alone does not prove alteration.

Evidence: 04-invoice.pdf, page 1 / PDF numeric typography outlier

F002 / Invoice price differs from purchase order

HIGH / Detected inconsistency

CAB-01: invoiced unit price 650.00; purchase order price 500.00. Difference on 100 invoiced units: 15,000.00.

Detection confidence: uncalibrated. Priority is a review category, not a fraud probability. Consult the source extraction confidence and original evidence.

Related findings sharing source regions: F001, F003

Next verification: Verify an approved price amendment before releasing payment.

Evidence: 04-invoice.pdf, page 1 / Invoice CAB-01

Evidence: 01-purchase-order.pdf, page 1 / purchase order CAB-01

F003 / Invoice quantity exceeds recorded receipt

HIGH / Detected inconsistency

CAB-01: 100 units invoiced and 80 received in this receipt. Difference: 20. Other receipts or advance-billing terms may explain this.

Detection confidence: uncalibrated. Priority is a review category, not a fraud probability. Consult the source extraction confidence and original evidence.

Related findings sharing source regions: F001, F002

Next verification: Check other delivery receipts and approved billing terms. This comparison covers only the uploaded receipt.

Evidence: 04-invoice.pdf, page 1 / Invoice CAB-01

Evidence: 02-delivery-receipt.pdf, page 1 / delivery receipt CAB-01

F004 / Payment account differs from vendor record

HIGH / Detected inconsistency

Invoice account ending 6655 differs from the uploaded vendor record ending 4455. A legitimate bank change is possible.

Detection confidence: uncalibrated. Priority is a review category, not a fraud probability. Consult the source extraction confidence and original evidence.

Related findings sharing source regions: none

Next verification: Confirm the account change using a previously trusted vendor contact and approval process.

Evidence: 04-invoice.pdf, page 1 / Invoice account

Evidence: 03-vendor-record.pdf, page 1 / Approved vendor account

Methods, uncertainty and limitations

Digital PDFs use embedded text and span metadata. Scanned pages use Tesseract English OCR. A small TF-IDF logistic classifier and explicit headings identify document types. Numeric typography observations compare monetary spans; intentional emphasis can trigger false positives. Structured rules compare extracted evidence. Optional hosted LLM narration, when enabled, receives extracted findings only and cannot create new detections.

Supported extraction targets English labelled vendor documents and SKU rows with quantity, unit price and amount. General layouts, handwriting, signature authentication, legal tax validation and external bank verification are unsupported. Partial deliveries, revisions, outdated vendor records, currency differences and OCR errors require human review. Demonstration files are fictional and the tests are not a production benchmark.

Audit trail

2026-11-09T17:00:13.197608+00:00 Investigation started with 4 submitted files.

2026-11-09T17:00:13.197662+00:00 Document submitted: 01-purchase-order.pdf.

2026-11-09T17:00:13.291841+00:00 Extracted 1dc2353a8ed1 (01-purchase-order.pdf): 1 pages, 8 fields, 2 item rows; type purchase_order; SHA-256 e3c3413d1c7bd87d455fb992697d09d9f96b2dcbbb87aebb3bf62a134407851c.
